CharField

```
class CharField(max_length=None, **options)
```

A string field, for small- to large-sized strings.

For large amounts of text, use `TextField`.

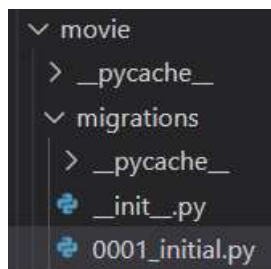

The default form widget for this field is a `TextInput`.

`CharField` has two extra arguments:

`CharField.max_length`

Required. The maximum length (in characters) of the field.
using `MaxLengthValidator`.

Student 'in game of Cluedo' with Asos over mystery item

April 8, 2022

A student has said she feels like she is in a "massive game of Cluedo" with online retailer Asos, after accidentally sending them one of her belongings when returning a package.

Leclerc beats Max Verstappen in practice as Mercedes struggles continue

April 5, 2022

Charles Leclerc headed Red Bull's Max Verstappen in Friday practice at the Australian Grand Prix. Leclerc ended the session 0.245 seconds ahead of the Dutchman, who appeared to have the potential to go faster had it not been for traffic and some errors.

An icy mystery deep in Arctic Canada

April 8, 2022

Known as the "Crystal Eye" to the Inuit, Pingualuit Crater was once the destination for diamond-seeking prospectors. But the real treasure is the stories its deep waters can tell.

XAMPP Control Panel v3.3.0 [Compiled: Apr 6th 2021]

The XAMPP Control Panel v3.3.0 interface is shown. It features a table with columns: Service, Module, PID(s), Port(s), and Actions. The services listed are Apache, MySQL, and FileZilla. Annotations with red circles and arrows indicate the following steps:

- 1: Click on the 'Start' button in the Actions column for the MySQL service.
- 2: Click on the 'Start' button in the Actions column for the Apache service.
- 3: Click on the 'Admin' button in the Actions column for the MySQL service.
